

# TIP OF THE MONTH!

September 2019

## Blue water soluble marking pens

When you use a blue water soluble pen on your quilt, **DO NOT** iron on it or it will become permanent.

To make sure that the markings will completely disappear, spray them with a solution made of **1 cup of cold/ice water** with a **heaping teaspoon of baking soda**. The baking soda will change the ph of the ink and it will not reappear.
